

## VA090

### **Level sensor**

For vacuum pumps VP Series and a separate liquid separator

Level sensor for vacuum pumps (VP Series) and/or separate liquid separator (VA05012) to detect the maximum level (by means of a light that comes on the box).

This allows the operator to take action to empty the liquid separator manually.

This level sensor can be mounted directly under the type plate (by 4 bolts) on one of the vacuum pumps (VP Series) and/or separate liquid separator.

Type no.:	VA09001
Order no.:	2070.9001
For vacuum pump:	VP00521 - VP00522 - VP00721 - VP00722 - VA05012 (liquid separator)
